6.034 Grade Calculator - Fall 2016

You can use this calculator to compute your scaled grades for each of the quizzes, to see where you stand overall before the final exam, and to do some what-if calculations to see what you need to do to take your grade to a higher level.

This calculator is believed to be an accurate model of the formulas in our grading spreadsheet, but you should not rely on the calculator without assuring yourself that the calculations seem correct given the numbers you enter.

Remember you can make up any Core or SRN grade by taking the corresponding part of the final.

Your lab grades are accessible online.
You can review the 6.034 grading policy on the course site.

We assign final letter grades as follows:

- You will get an A if your average score is 4.5 or higher.
- You will get at least a B if your average score is 3.5 or higher.
- You will get at least a C if your average score is 2.5 or higher.

Lab Average

4.53

Quiz 1	Core (100)		Core	
5 ≥87				
4 ≥72	65		3.05	
3 ≥59				
Quiz 2	Core (100)	SRN	Core	SRN
5 ≥88				
4 ≥72	50	3	2.04	3.00
3 ≥59				
Quiz 3	Core (100)	SRN	Core	SRN
5 ≥90				
4 ≥78	47	6	1.05	5.00
3 ≥64				
Quiz 4	Core (100)	SRN	Core	SRN
5 ≥89				
4 ≥78	50	3	1.78	3.00
3 ≥64				

Your computed grade: 2.87
